### **Drumpellier Golf Club – Coatbridge, Lanarkshire**

Drumpellier Golf Club is a private members club established in 1894 and remains one of Lanarkshire's most popular courses. Located just east of Glasgow, Drumpellier Golf Club sits at the west end of Coatbridge with a challenging but play-friendly 18-hole course to appeal to a wide range of skill levels. The club is equipped with practice areas, a Pro shop, a clubhouse, a comfortable bar, and a restaurant adding to their growing energy bills.

While expanding their club, Drumpellier were looking for a forward-thinking energy plan to make all aspects run efficiently. Concluding that a strategic evaluating of renewable energy solutions would help drive down operation costs. By considering the adoption of renewable energy sources such as solar panels they aimed to not only reduce their energy expenses but also minimize their carbon footprint.

#### **Renew-Able's Intervention:**

- Solar Panels: 410W Mono Solar Module
- Inverter- Growatt 3 phase 11100W Inverter

*"Drumpellier Golf Club would like to thank Renew-able Solutions for the successful installation of solar panels onto their main roof of the Clubhouse. The process from quotation to installation and final commissioning was carried out in a professional manner and as programmed by Renew-able Solutions. Renew-able Solutions and their scaffolding subcontractors also took into account the installation of the panels had to be done in a safe manner with as little impact on the daily operations of the Golf Club, which they successfully achieved."* - **Gerry McCabe**

The integration of renewable energy into a Drumpellier Golf Club infrastructure has resulted in a host of positive changes and improvements. First and foremost, it significantly reduces energy costs, enabling the club to allocate financial resources more effectively to enhance the overall golfing experience for members and guests, as well as going forward with their expansion plans. Additionally, renewable energy solutions like solar panels promote sustainability and environmental responsibility, positioning the club as a conscientious and forward-thinking institution with carbon reduction.
